91. Moderní JavaScript - Posouváme čtvereček do všech stran pomocí šipek na klávesnici

HTML

```html
<div class="square"></div>
```

CSS

```css
*{
    box-sizing: border-box;
    padding: 0;
    margin: 0;
}

.square{

    width: 40px;
    height: 40px;
    background-color: red;
    position: relative;
    top: 0;
    left: 0;
}
```

JAVASCRIPT

```javascript
let square = document.querySelector(".square")

let newLeft = null;
let newTop = null;

document.querySelector("body").addEventListener("keydown", function(event){
    if(event.key === "ArrowLeft"){
        newLeft = newLeft - 10
        square.style.left = newLeft + "px"
    } else if (event.key === "ArrowRight") {
        newLeft = newLeft + 10
        square.style.left = newLeft + "px"
    } else if (event.key === "ArrowUp"){
        newTop = newTop - 10
        square.style.top = newTop + "px"
    } else if (event.key === "ArrowDown"){
        newTop = newTop + 10
        square.style.top = newTop + "px"
    }
})

// // posúvanie dolu
// square.style.top = "10px"

// // posúvanie hore
// square.style.top = "-10px"

// // posúvanie doprava
// square.style.left = "20px"

// // posúvanie doľava
// square.style.left = "-20px"
```
